STANDARD OPERATING GUIDELINE

STANDARD OPERATING GUIDELINE

630

Chronological History

Effective: January 1, 2010

OUT OF STATION MAINTENANCE

1. When maintenance is done on any piece of equipment out of station, it is the responsibility of the driver returning the piece to the station, the station lieutenant, district captain or assigned personnel to ensure that the equipment is fully operational.
2. This will include checking the water levels, hose loads, breathing apparatus, appliances and any other associated equipment that belongs on the piece of apparatus.
3. Only after the equipment is verified to be complete, the apparatus may then be placed back in service.

By Authority of:
Fire Chief

Eugene Shaeffer
