

April 25, 2004

Dear friends and family,

Once again we turn to our friends and family for friendship and support. We are pleased to announce that we are organizing the 2nd Annual "RUN FOR RETT" to raise research dollars for Rett Syndrome. Most of you know that our daughter, Chelsea, has Rett Syndrome. Rett Syndrome is a severe developmental disorder which affects Chelsea's ability to walk, talk and have purposeful use of her hands. Chelsea's only means of communication are her eyes and body language, which we are happy to say she uses to the maximum of her ability to let us know how she feels.

There are thousands of young girls and women affected with Rett Syndrome and it is our desire to help in every way we can. So we turn to you and your company to ask that you help us, help the girls who cannot speak for themselves and of course, we ask help for our precious daughter, Chelsea.

Enclosed is information regarding Rett Syndrome, the Run for Rett and the Run for Rett Corporate Sponsorship program. Please give this information your consideration.

With your and your company's generous contribution, we hope research can be advanced to the point where Chelsea, age 12, could one day walk, talk and use her hands even for the most ordinary things like dressing and feeding herself. What a miracle that would be!

Thank you to all who participated so generously in last year's Run for Rett. With help from our friends, families, co-workers and generous community, our First Annual Run for Rett in San Diego raised over \$37,000.00 which will help the efforts to find a cure for our girls.

We also want to thank you for taking the time to read this material and any help you and/or your company can give would be greatly appreciated.

Sincerely,

Veleria and Jim Fabiszak
