

DERBY BOROUGH TRANSPORT HISTORICAL FLEET LIST

This list is not complete - Please email any additions or corrections to this list - thanks!

Some notes on Derby's fleet numbering may be helpful. The prewar motorbus series reached 73, and the first wartime utility bus (a solitary Bristol K) took the fleet number 74. The series then reverted to 1, with 1-21 being Daimler and Guy utilities. By 1949, however, the new series was 'catching up' with the earlier prewar numbers, hence the jump from 41 to 75 to avoid duplication. This series then continued right up to 315, delivered in 1981; lowheight double deckers and coaches were numbered in separate series, as were the four Daimlers acquired secondhand from Halifax. A new series for new-generation double deckers was begun in 1978 by Foden NC number 101.

Trolleybuses followed on from the tram series, with the first one (79) arriving in 1932; the series then continued unbroken to 243 of 1960. The motorbus series nearly caught up with the trolleybus numbers in 1966, but the complete withdrawal of trolleybus services in 1967 eliminated this problem.

Trolleybuses

F/No	Reg. No.	Chassis	Body	Year
