

CURRICULUM VITAE

PERSONAL INFORMATION

Name RYABOV, Boris
Address Ropazu 5 - 13, Riga, LV-1039, Latvia
Telephone +371 - 755 12 78, +371 - 703 45 85
Fax +371 - 782 11 53, +371 - 782 01 80
E-mail ryabov@latnet.lv
Nationality Russian
Date of birth 05.11.1951

WORK EXPERIENCE

- Dates 1997 to date
• Name and address of employer Institute of Astronomy of the University of Latvia
Rainis Boulevard 19, LV-1586, Riga, Latvia
Telephone +371 - 703 45 85
Fax +371 - 782 01 80
• Occupation or position held Senior Researcher
• Main activities and responsibilities Coordination and analyses of solar observations taken with the RT-32 radio telescope.

- Dates 1998 to date
• Name and address of employer Ventspils International Radio Astronomy Center
Akademijas laukums 1, LV-1050, Riga, Latvia
Telephone +371 - 722 83 21
Fax +371 - 782 11 53
• Occupation or position held Senior Researcher
• Main activities and responsibilities Model analyses of solar polarization observations taken with the radio telescopes RATAN-600, SSRT, NoRH, VLA. Student advising.

- Dates 1994 – 1996, 1991 – 1998, 1980 – 1986
• Name of employer Radioastrophysical Observatory, Latvian AS
• Occupation or position held Leading Researcher
• Main activities and responsibilities Model analyses of the local microwave sources on the Sun.

- Dates 1992 – 1993
• Name of employer Special Astrophysical Observatory, Russian AS
• Occupation or position held Visiting Scientist
• Main activities and responsibilities Review current solar observations taken with the new Panoramic Spectra Analyzer of the radio telescope RATAN-600.

<ul style="list-style-type: none"> • Dates • Name of employer • Occupation or position held • Main activities and responsibilities 	<p>1984 – 1987, 1977 – 1979, 1974 – 1976</p> <p>Main Astronomical Observatory (Pulkovo)</p> <p>Visiting Scientist, Ph.D. Student, Assistant (work on probation).</p> <p>Model analyses of coronal holes, young Latvian astronomers advising. Solar observations with the RATAN-600 and the BPR, model construction and simulation of gyro resonance emission and quasi-transverse propagation of microwaves. Data reduction of the BPR solar observations.</p>
--	--

EDUCATION AND TRAINING

<ul style="list-style-type: none"> • Dates • Name and type of organization • Principal subject • Title of qualification awarded 	<p>1983</p> <p>Main Astronomical Observatory, Leningrad, USSR</p> <p><i>Ph.D. Thesis:</i> "Model simulations of the sunspot magnetic fields in the solar corona on the base of radio observations of the local sources on the Sun"</p> <p>Ph.D., Astronomy</p>
<ul style="list-style-type: none"> • Dates • Name and type of organization providing education and training • Principal subjects • Title of qualification awarded 	<p>1977 - 1979</p> <p>Main Astronomical Observatory, Leningrad, USSR (Pulkovo Astronomical Observatory, St. - Petersburg, Russia)</p> <p>Astronomy under Prof. G.B. Gelfreikh supervision</p> <p>Ph.D. student</p>
<ul style="list-style-type: none"> • Dates • Name and type of organisation providing education and training • Principal subjects • Title of qualification awarded 	<p>1969 - 1974</p> <p>Mathematics and Mechanics Department</p> <p>Leningrad State University, Leningrad, USSR</p> <p>Mathematics, Astronomy, Astrophysics</p> <p>M.Sc., Astronomy, <i>M.Sc. Thesis:</i> "Model ... "</p>

CONTRACTS AND PROJECTS**Latvian Council of Science (LCS)**

- "Microwave observations of the Sun as information system on solar activity forecast", 11.1856, 2011 - 2013, PI.
- "Solar Investigations on the Basis of the VIRAC 32-m Radiotelescope", 96.0129, 1997 - 2000, PI.
- "Solar Investigations at Microwaves", 01.0042.6.1, 2001 - 2004, CR.
- "Microwave observations of the Sun", 05.0024, 2005 - 2009, CR.

Ministry of Education and Science (MES) , Republic of Latvia

- "Application of the CLEAN and MEM procedures to the RT-32 radio maps of the Sun", 08-4, 2008, PI.

Commission of the European Communities (6th Framework Programme)

- "Space Weather and Europe - an Educational Tool with the Sun" (SWEETS) , 044532, 2007, CR .

International Association for the promotion of co-operation with scientists from the New Independent States of the former Soviet Union (INTAS)

- "Solar Coronal Magnetography", INTAS 00 - 0181, 2001 - 2003, CO.
- "Study of the MHD Oscillations in the Solar Active Regions Using Radio Observations", INTAS 00 - 0543, 2001 - 2004, CR.

International Science Foundation (ISF)

- "Three-Dimensional Structure of the Coronal Magnetic Fields of Active Regions on the Sun", LFB000, 1994 - 1995, PI.

COMPUTER EXPERIENCE

Fortran, IDL, HTML, LaTeX.

DRIVING LICENCE

since 1998

ANNEXES

RESEARCH INTERESTS

- Solar atmosphere of large isolated sunspots
- Reveal the physical conditions in the solar atmosphere above large isolated sunspots where the outward plasma flow of the solar wind is observed.
- Solar coronal magnetography
- Improve the technique of coronal magnetography relating to the data taken with the radio telescopes RATAN-600, Nobeyama Radio Heliograph (NRH), Siberian Solar Radio Telescope (SSRT), and Very Large Array (VLA).
- Analyze the series of the coronal magnetograms of active regions to investigate MHD oscillations and topological peculiarities in coronal magnetic structures.
- Large - scale coronal structures
- Evaluate the magnetic field strength, plasma density and temperature within coronal holes, coronal streamers, and coronal loops by means of radio spectral polarization observations with the radiotelescopes RATAN-600 and VLA.
- Elaborate numerical models (thermal radiation and propagation of microwaves) to analyze radio observations comprehensively and predict new features of large-scale coronal structures.

SELECTED CONFERENCE PROCEEDINGS

1. Bezrukov D., Ryabov B., Shibasaki K. „Isolated sunspot with dark patch in coronal emission”,- BAASP 2012 – 1st International Scientific Conference. 7 – 8 May, 2012, VeA, Ventspils, Latvia.
2. Ryabov Boris, Bezrukov Dmitry “VIRAC: Recent results in Solar Radio Astronomy - Preparation for Space Weather activities” „EU- Russia open days’ workshop, October 24 – 25, 2011, Vienna, Austria (http://rp7.ffg.at/upload/medialibrary/11_Ryabov.pdf).
3. Bezrukov D. A, Ryabov B. I. “Prospects of solar microwave observations at the Ventspils Radio Astronomy Center”,- The Community of European Solar Radio Astronomers (CESRA), Conference “Energy storage and release through the solar activity cycle - models meet radio observations”. La Roche en Ardenne (Belgium), from June 15 to June 19, 2010.
4. Hippler R., Glover A., Wolfgram F., Jansen F., Kokowsky M., Schmieder B., Poedts S., Stanislawska I., Stelmach J., Kudela K., Reis R., Nakamura R., Denne W., Gausa M., Beck P., Tulunay Y., Ryabov B.. “Space Weather and Europe – an Educational Tool with the Sun (SWEETS)”,- Fourth UN-ESA-NASA-JAXA Workshop on the International Heliophysical Year and Basic Space Sciences "First Results from the International Heliophysical Year 2007", 2-6 June 2008, Sozopol, Bulgaria.

5. Ryabov B. I. "Coronal Magnetograms of Solar Active Regions", - Proceedings of Nobeyama Symposium 2004, Kiyosato, Japan, October 26 - 29, 2004, "Solar Physics with the Nobeyama Radioheliograph", NRO Report N1, 2006, p. 111-119.
6. Peterova, N. G., Agalakov, B. V., Borisevich, T. P., Korzhavin, A. N., Ryabov, B. I. "The three-dimensional structure of the corona above active region NOAA 9591 from microwave observations". - Astronomy Reports, 2006, v. 50, Issue 8, p.679-686.
7. Ryabov B. I., Bogod V. M., Gelfreikh G. B., Maksimov V. P., Drago F., Lubyshev B. I., Peterova N. G., Borisevich T. P., Bezrukova D. A "Coronal magnetograms of solar active regions" , - Proceedings of the International Astronomical Union Symposium No.223 2004, "Multi-Wavelength Investigations of Solar Activity", A.V. Stepanov, E.E. Benevolenskaya, A.G. Kosovichev ed-s, v. 2004, Issue IAUS 223, November 2004, p.215-218.
8. Ryabov B.I. *Coronal Magnetography from Quasi-Transverse Propagation*. - Green Bank Workshop "Solar Radiophysics with the Frequency Agile Solar Radiotelescope, NRAO, Green Bank, WV, USA, May 23-25, 2002, Program and Abstracts, p.37.
