

Dear Sir,

I would like to take this opportunity to introduce myself, my name is John Bloom, and I'm currently employed as an Engineer of Radiological Work at the Bettis Atomic Power Laboratory, with a current Department Of Energy "L" Level Clearance. I graduated from Pennsylvania State University with a Bachelor's Degree in Nuclear Engineering, and spent Four years as an Engineering Officer in the United States Navy. I graduated from the New York Institute of Technology with a Master's Degree in Environmental Technology, and a Cumulative Grade Point Average of 4.0 out of a 4.0 scale in December of 1995. My Master's Thesis was selected and presented at the Northeast Waste Management Officials Association's Pollution Prevention Consortium of New England's Annual meeting held at Harvard University's John F. Kennedy School of Government.

I am seeking employment as an RADIOLOGICAL/NUCLEAR ENGINEER, though I prefer to stay in the Pittsburgh, Pa. area, I am married and my wife and I are willing to re-locate in the southeastern United States. All suitable positions will be considered. Currently I earn \$65,000/year as a Radiological Engineer, developing Technical Work Documents to remove and dismantle contaminated systems.

Sincerely,

John B. Bloom
